TO WHOM SO EVER IT MAY CONCERN

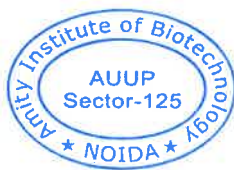

This is to certify that Mr. Ayush Vardhan Khanna, class 11th student of Step by Step School, Noida worked under my supervision on the project titled “Understanding the antifungal potency of Natural compound MF-095 on *Magnaporthe Oryzae*, a causative agent of Rice blast” from 20th May 2019 till 31st May 2019. This work was a part of the project funded by BAYER AG, Germany Under Grants4targets scheme.

During this period, he learnt techniques such as fungal and bacterial staining, micro-broth dilution assay, biochemical assay for protein estimation, DNA extraction, electrophoresis, PCR and microscopic analysis including Scanning Electron Microscopy.

He worked with enthusiasm and zeal. He showed inquisitiveness and was eager to learn new techniques. He was punctual during the entire duration and was amicable in his approach towards the lab members.

I wish him all the best in his future endeavors.
